

Autosport 2009, at the NEC, Birmingham.

### RACELOGIC at the World's Largest Motorsport Show

Autosport 2009, held 8th – 11th January, hosted a striking new **RACELOGIC** stand from which to launch the **VIDEO VBOX**.

Entertaining show-goers with a person on the graphical overlay of **VIDEO VBOX** looking remarkably like Top Gear's 'Stig', **RACELOGIC** staff enjoyed demonstrating the capabilities of the ground breaking new product to everyone from test engineers to track day enthusiasts.

Taking place at the Birmingham NEC, UK, the show featured suppliers from all areas of automotive performance over four days with an estimated 80,000 attendees. If you missed it this time, you can see **VBOX** products first hand at the SIAT EXPO 09 at ARAI, in Pune, India, this week from 21st – 24th Jan, or visit [www.racelogic.co.uk](http://www.racelogic.co.uk).

### Free CAN datasets

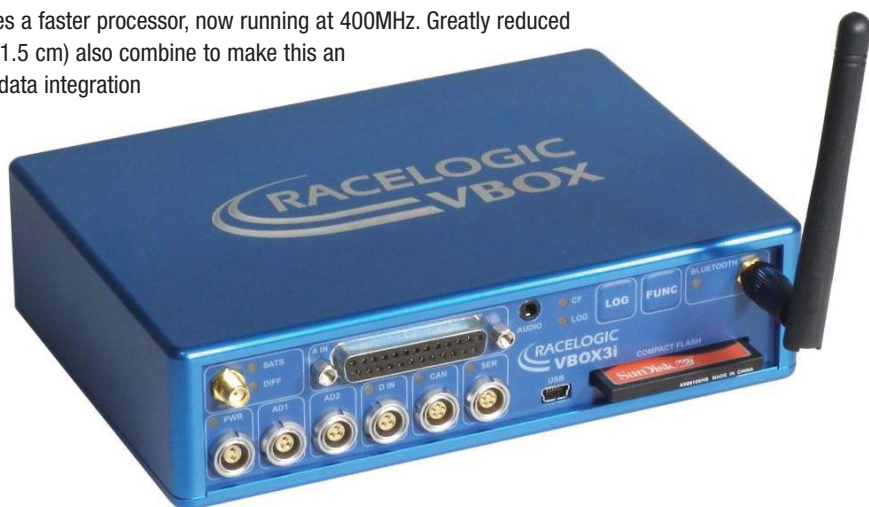

**RACELOGIC** are delighted to announce that with immediate effect, we will now supply manufacturers' CAN datasets as standard with every VCI enabled **VBOX**, representing huge savings to users.

The dataset features CAN identifiers for over 25 vehicle manufacturers and allows drivers and engineers to record multiple parameters from the vehicle such as RPM, steering angle, brake pressure, and even individual wheel speeds. The **RACELOGIC** dataset is constantly growing as we work with more and more manufacturers, enabling us to pass the unique resource onto **VBOX** users at no charge. Further information on using CAN is available [here](#).

### New VBOX 3i

Reaching the final stages of testing, the release is imminent for **VBOX 3i** – the successor to the hugely successful **VBOX III**.

Retaining all the functionality of **VBOX III**, **VBOX 3i** features a faster processor, now running at 400MHz. Greatly reduced measurement latency and improved brake stop accuracy (+/-1.5 cm) also combine to make this an exciting new product. Other significant additions include IMU data integration capability, USB, Bluetooth and Audio interfaces, and reduced power consumption meaning longer battery life. Improved power efficiency also eliminates the need for the heat sinks featured on **VBOX III**, saving space. Upgrades from **VBOX III** will be available when **VBOX 3i** is launched later this month – see your dealer for details.

## VIDEO VBOX at Silverstone

Demand is growing for **VIDEO VBOX** as drivers and engineers alike realise the advantages of high quality, multi-camera video combined with graphical overlay, a powerful GPS engine, and even CAN vehicle data. This potent combination of features was put to impressive use just a few miles from the **RACELOGIC** Office... on Silverstone circuit in a Nissan GT-R.

Used by the Silverstone Driving School, **VIDEO VBOX** is fast becoming an indispensable tool to analyse both driver and vehicle performance, as shown in the instructional footage here.

**Also announced this month...** is an additional package to **VIDEO VBOX** range. The unit will come supplied with a single high quality bullet camera, and with fully customizable scenes pre-loaded, is ready to go out of the box. With the inclusion of a fixed discreet **VIDEO VBOX** logo, this package represents our most affordable camera included **VIDEO VBOX**. See your local dealer for more details.

## Motorcycle testing in China

Responding to customer demand for a reliable motorcycle performance and fuel consumption test, Chinese **VBOX** distributor Guangzhou Zeer have developed a **VBOX II SX** with **MINI INPUT MODULE** which lies at the heart of a bespoke system used for measuring speed, acceleration, fuel consumption, and brake pedal force amongst a host of other parameters.

Using the combination of test equipment as shown, the inclusion of **VBOX II SX** provides a unique set up. With its compact size, intuitive software, and economical price, it has little competition in China for motorcycle testing. For more information contact Jack Tan of Guangzhou Zeer.

## VBOX Training Days – Free

As mentioned in the December **VBOX** newsletter, we are holding regular training sessions for **VBOX** and **VIDEO VBOX** owners at our office in Buckingham. Free to attend, the sessions are allocated on a first come first serve basis. The following dates are planned: 29th January, 26th February, and 26th March.

Please contact **Jacque Fielder** for more details. We still have a few places available for the January session, so book now to avoid disappointment!

Head Office: Unit 10, Swan Business Centre, Osier Way, Buckingham, Bucks MK18 1TB, England
